

Mason Jar Jack - O - Lantern Directions

Supplies:

Orange and Green Crepe Paper

Green Pipe Cleaner

Black Adhesive Felt

Mason Jar

Container of Mod Podge

Paintbrush

Pre-lit Candle

Scissor

Directions:

1. Have your child cut the orange and green crepe paper into small pieces.
2. Spread mod podge on small portion of the outside of the glass jar. Then place some of the orange crepe on area that has mod podge on it. Repeat until the whole outside of glass jar is covered with orange crepe paper.
3. Then do the same thing to the cover. However use the green crepe paper. There is a small hole in the top of the cover. You will be poking the green pipe cleaner through the lid once the crepe paper dries for the stem.
4. Next take your black adhesive felt and draw on the back your Jack - O - Lantern's face (eyes, nose & mouth). Talk to your child about what shapes they can make. Each part can be cut out separately. This may be something the adult may need to cut as the felt is a little more difficulty to cut threw.

5. Once your pumpkin is dry, you can stick your jack-o-lantern's face on it.
6. Add pipe cleaner stem to the cover by pushing it through the hole created for you. Wrap pipe cleaner around your finger to create a curved stem.
7. Then place pre-lit candle in the jar and now you have a cute jack - o - lantern.
8. Enjoy your Jack - O - Lantern!
