

Owl Craft Directions:

Supplies:

Three Small Paper Plates
Brown Paint
Paintbrush (from previous class)
Pair of Googly Eyes
Orange Felt
Feathers
Brown Construction Paper
Tacky Glue (from previous class)
Pair of Paper Fasteners
Scissor
Pencil/Pen

Directions:

1. Take one of your small paper plates and have your child cut it in half.
2. Take another small paper plate and draw the head of the owl making sure you have pointed ears. Your child can then cut the head of the owl out.
3. Next you will paint all of the plates brown, beginning with the one your child cut in half, then paint the head and lastly the body. Let all of them dry!
4. Now you are going to glue feathers to the plate that was cut in half using tacky glue. Spread out the feathers so they cover all of the wings.

5. Next you will add the eyes and nose to your owl's face. Cut a triangle out of the orange felt. Use tacky glue to glue down the googly eyes and nose.
6. Take the brown construction paper and draw a circle on it. Have your child cut out the circle and glue it on the small paper plate (owl's body) that hasn't been cut.
7. Once everything is dry, glue the head to the body. Then use the paper fasteners to attach the wings so they are able to move their owl's wings. Time to make your owl fly!
