

## Apple Craft Directions:

### Supplies:

Paper Bag Cut-out Apples (front & back)

Red Yarn

Newspaper

Red Paint

Sponge

Green & Brown Construction Paper

Scissor

Glue Stick

Hole Puncher

### Directions:

1. If you have a hole punch at home, line up the two paper bag apples (make sure plain sides are on outside) and punch holes around the edge of the apple approximately one inch apart.
2. If you don't have a hole punch, your apple will already be hole punched for you.
3. Start at the top part of the apple, tie a knot on the back. Then lace the red yarn through each of the holes around the outside of the apple. Stop with about 5-6 holes to thread through. Take your newspaper and crumble it up. Put it inside of the apple. Then finish lacing up the apple and tie it in the back.
4. Glue on the brown construction paper stem of the apple to the middle of the apple using a glue stick. Then draw a leaf on

the green construction paper, cut it out and glue it on the stem.

5. Pour red paint on paper plate. Then use the sponge to paint your apple. Let it dry and then you have an apple!
