

## Frog Project

### Materials Provided:

White Paper Plate

Green Paint

Paintbrush

Red and Green Construction Paper

Pair of Google Eyes

Glue Stick

Scissor

Pencil/Marker

### Directions:

Prior to class, please have your child paint both sides of their plate green.

Then it is all set for Tuesday.

1. Fold your plate in half. Then cut larger piece of red construction paper into a half circle. This will be glued inside the paper plate. Prior to glue it down, wrap the long red piece of construction paper around your child's finger. This is the tongue of their frog. Glue the tongue down in the center of the inside of the plate. Then place the red half circle over the top of the tongue.
2. Next we are going to make the eyes for our frog. Cut the large rectangular green paper in half. Then fold one of the halves in half. Draw a large circle and cut it out. Make a small crease on the bottom of the circles and glue them to the crease of the paper plate. Then glue a google eye on each of the green circles. (Refer to picture if needed)
3. Finally we are going to make the legs of our frog. Take the two long pieces of green paper and according fold them. Glue them to the sides of the opening of the plate. Next we need to make the frog's feet. Take the other half of the green paper and fold it in half. Draw your frog's web feet and then cut them out. Glue them to the bottom of the according folded paper. Ribbit! Ribbit!
